The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/599,929	<b>Applicant(s)</b> GADINI, COSTANZO	
	<b>Examiner</b> Daniel C. Comings	<b>Art Unit</b> 3744	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Election/Restriction***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

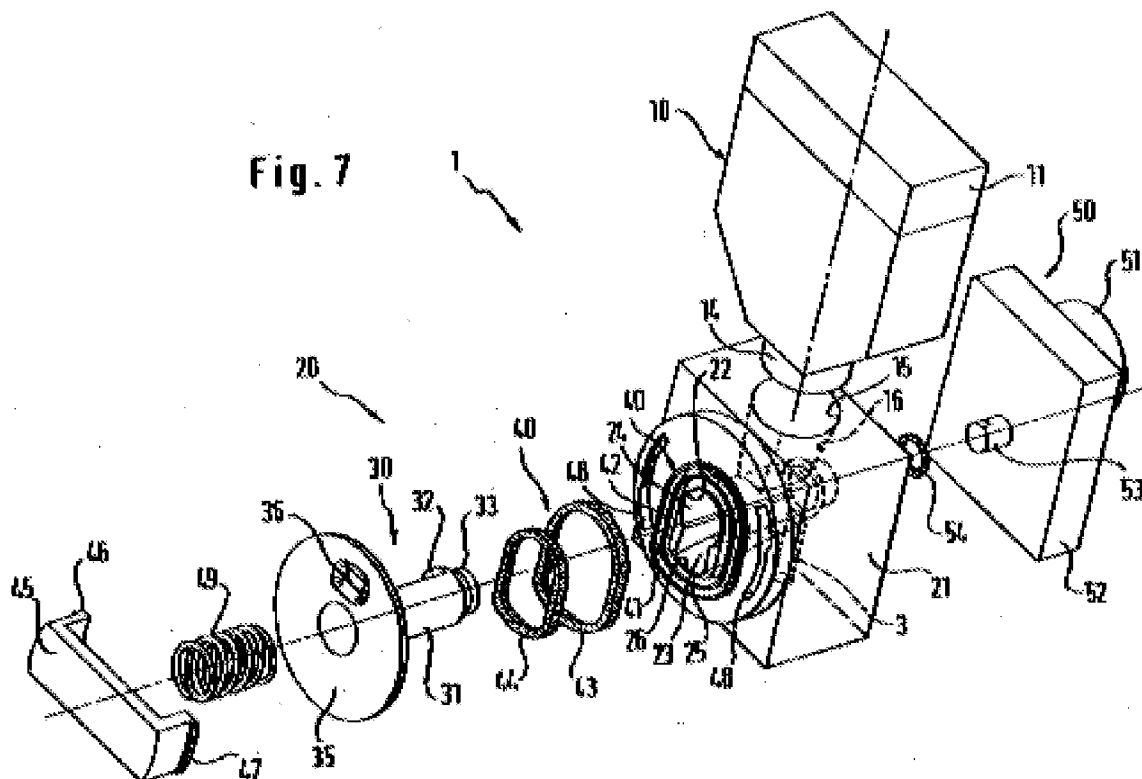

Group I, claims 102-160, drawn to a detergent dispenser having a detergent receptacle including thermal insulation and/or conditioning means to prevent thermal degradation of detergent in the detergent receptacle.

Group II, claims 161-163, drawn to a method of controlling a device including actuating and/or controlling a thermal insulation and/or conditioning means for a detergent receptacle in a detergent dispenser.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I does not include the control or controllability of the thermal insulation and/or conditioning means of Group II and thus could read on a device in which the thermal insulation is a passive feature such as a fixed insulative coating on the detergent receptacle.

Art Unit: 3744

Furthermore, the features which are common to the groups are taught by US Patent No. 5,694,794 to Jerg et al. Jerg teaches in fig. 7, shown below, a detergent dispensing device having a body and inner parts (as shown in the exploded view of fig. 7, for use with an apparatus capable of producing temperature rises (the device is taught in lines 51-52 of col. 2 for use with "household dishwashers and household washing machines" and includes a container (detergent holder 10) having thermal conditioning means for preventing deterioration of the detergent (a stream of compressed air, taught in the Abstract of Jerg, acts on the detergent holder to prevent clumping of the detergent.)

A telephone call was made to Frank P. Piskolich on 24 September 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel C. Comings whose telephone number is 571-270-7385. The examiner can normally be reached on Mon-Fri 8:00-5:00 EST.
